

With one of the largest container inventories in Eastern Ontario, Tomlinson provides sustainable disposal solutions for residential, municipal, industrial, commercial and institutional customers.

Waste & Recycling Management

With a commitment to preserving our natural resources, Tomlinson has developed efficient waste and recycling services using modern equipment. Our recycling programs ensure you divert the highest level of waste, helping you protect the environment while increasing your efficiency.

Services

- Waste and recycling bin and container rentals, from roll-off bins to individual recycling containers
- On-site waste collection and recycling operations
- Municipal curbside collection
- Recycling facilities for fibre, glass, and tin
- Organics collection
- Monthly, quarterly & annual waste diversion reporting

Recycling Containers

Our efficient front load containers can be used for garbage, waste or recycling. They are available in 4 standard sizes. We also offer in-ground front load containers.

Our rear load containers come in 2 standard sizes and are ideal for commercial waste, renovation projects, or areas with limited space.

Products Available

- Roll-off dumpsters in 3 primary sizes
- Front-load containers for waste or recycling
- In-ground front-load containers – excluding Molok®
- Recycling containers
- Compactors to own or lease

CUSTOMIZED FOR YOUR NEEDS

The Tomlinson Environmental Services team will expertly develop a customized plan to clarify your waste management needs, identify challenges and create the right course of action.
