

With an extensive range of complimentary services, customers turn to Tomlinson as a turnkey solution for all their solid waste management. Our innovative waste management & recycling services help commercial, municipal & residential customers have a positive impact on the environment.

Waste & Recycling Management

With a commitment to preserving our natural resources, Tomlinson has developed efficient waste and recycling services using modern equipment. Our recycling programs ensure you divert the highest level of waste, helping you protect the environment while increasing your efficiency. Services include:

- Customized plans
- Audits
- Waste and recycling bin and container rentals, from roll-off bins to individual recycling containers
- On-site waste collection and recycling operations
- Municipal curbside collection
- Recycling facilities for fibre, glass and tins

Landfill Management

Leveraging our broad range of integrated waste management services, Tomlinson is able to construct, operate and manage landfills while offering innovative technologies to divert a large percentage of waste. Our landfill management experience ranges from construction and cell development through to capping and closing a site.

Container Rentals

With one of the largest container inventories in Eastern Ontario, Tomlinson provides sustainable disposal solutions for residential, municipal, industrial, commercial and institutional customers.

- Front load containers in 4 standard sizes
- Heavy duty recycling containers in 2 standard sizes
- Roll-Off dumpsters in 3 primary sizes
- Front-load containers for waste or recycling
- In-ground front-load containers excluding Molok®
- Recycling containers
- Compactors to own or lease

Waste Recovery & Diversion

All Municipalities face the challenge of managing waste in an environmentally responsible manner. For those looking to extend the life of their landfills or simply divert whatever they can, Tomlinson has the answer.

As part of our Waste Recovery Centre, Tomlinson operates a Materials Recovery Facility and a Construction and Demolition Recycling Facility – both provide our customers with the opportunity to divert some of their waste. The more we are able to divert waste from landfills, helps extend the useful life of landfills.
