

**Tomlinson meets the increasing demands for sustainable transportation infrastructure systems for federal, municipal, residential and commercial customers with its turnkey solutions.**

## City/Municipal Construction

Municipalities have a continual need for sustainable transportation infrastructure systems, from highways and roads to pathways and sidewalks. Tomlinson offers the expertise, experience and resources to meet the regulatory, safety, time and budgetary demands of municipal projects throughout Ontario.

### Building a Better Ottawa

Tomlinson has been recognized for our contribution to building a better Ottawa.

- Ontario Light Rail Transitway (OLRT- Phase 1) asphalt & paving
- Canadian Tire Centre infrastructure
- Highways 416 & 417 - road reconstruction
- Paving of bridges
- Macdonald-Cartier International Airport - reconstruction of runways
- City of Ottawa Environmental Excellence Award - Churchill Ave, Ottawa's first "complete street"
- Lansdowne Park site and infrastructure development

## Capabilities

- Road construction & rehabilitation
- Site development
- Subdivision development
- Streetscaping

## Commercial Construction

Commercial and sub-division developers continue to choose Tomlinson for our superior service and quality. Our commitment to identify our clients' needs and to provide customized, unique solutions has resulted in continual growth of this division.
