

Tomlinson is Ottawa's largest and most experienced sewer and watermain contractor with 50 years' experience serving the Eastern Ontario market.

Value Engineering

With extensive experience, our team is able to provide value engineering services on how best to approach any project. This focused team of management, supervisors and professionals delivers complex projects, on time and on budget to partners and customers.

Municipal

Tomlinson has led some of the largest and most complex municipal rehabilitation projects in Ottawa, and we continue to be the city's preferred contractor. We pride ourselves on working with the community and local businesses. We have been working successfully with municipal, provincial, and federal agencies for more than 50 years to complete projects which benefit the municipality of Ottawa and surrounding regions. Using top of the line construction equipment and an experienced staff has allowed Tomlinson to continually deliver quality infrastructure projects in a timely manner.

Commercial

Tomlinson has a long and successful history working closely with Ottawa's private sector. We carefully manage every step and ensure constant collaboration among the owners, consultants, and contractors. Our knowledgeable team is experienced in all aspects of residential construction jobs with the horsepower to complete large projects in a short time frame. Our excellent results stem from a focus on delivering quality as well as staying on schedule.
