

Our comprehensive offering, including site services and design-build expertise, ensures an efficient and high quality project from the ground up.

Market Leader

Since 1967, we have built a reputation as a market leader in excavation and piling in Eastern Ontario. We are CWB certified so you can be assured of quality work. Our team is led by a group of industry veterans who boast nearly 40 years of combined construction, land development and real estate experience. These professionals bring their design-build expertise to every project, helping customers maximize the use of their property. Our team will fine tune your design where appropriate, ensuring constructability and material availability for your project.

With experience in unique projects such as the West Block Rehabilitation Project on Parliament Hill, through to demanding heavy civil projects such as bridges and the LRT, our team can support you in any construction project.

Capabilities

- Shoring, earth support, rock face protection
- Deep foundations
- Excavation
- Site services

Full Service

Thanks to Dufresne's comprehensive capabilities, our team can undertake both excavation and piling/shoring. This allows you more efficient coordination of onsite activities. Not only does this provide more cost certainty, it can lead to efficiencies in time, as well as improvements in the quality of your project.
