

Tomlinson is the leading supplier of Ready Mixed Concrete in Eastern Ontario for residential, industrial, commercial, civil and agricultural construction projects.

GPS Tracking

The entire fleet of Tomlinson Ready Mix trucks is outfitted with an internal Global Positioning System (GPS) tracking system. This complementary service enhances efficiency and productivity by allowing our customers, dispatchers and project teams to track orders and the delivery of concrete to their job sites in real-time through our Marcotte Systems web portal.

SmartRock™ Technology

SmartRock™ is a new value-added solution which offers real-time concrete temperature and strength results on the job site. This is made possible through a combination of wireless bluetooth sensors and the SmartRock™ mobile app. Other benefits include:

- Better control on project scheduling
- Early project completion time
- Reduced labor costs and break tests

Extensive Product Range

- ICI construction (industrial, commercial, institutional)
- Civil construction (OPSS)
- Residential construction
- Agricultural construction
- High performance concrete
- Self-consolidating concrete
- Flowable concrete
- Lightweight concrete
- High density concrete
- ICF concrete (insulated concrete forms)
- Coloured concrete
- Waterproofed concrete
- Reinforced concrete (fibres, integral hardener)
- Delayed/fast setting concrete
- Climate Shield (integral sealer)
