

NEW HORIZONS

Dear TREAD Users,

What's happening?

We are excited to announce that, through our partnership with TREAD, we will be migrating from the TREAD Enterprise dispatch tool to their new TREAD Material & Logistics dispatch tool (also known as Horizons). This update will allow for a more stable environment with less technical errors and streamline tracking to allow for more accurate reporting.

TREAD and Tomlinson have spent the last two years working on a solution that focuses on a Field First solution, focusing on accessibility and drivers. This has resulted in a solution that allows for the creation of accurate timesheets and driver hauling records.

What am I expecting?

A new app will be installed on your device(s): Tread Material & Logistics

When: Friday December 13th, 2024 between 3PM & 4PM

What do I need to do? Absolutely nothing! All we ask is that you be aware of the install. IT Mobility will be reviewing the success of the install on your device and reach out as needed.

Where do I go for help?

Send an email to: ChangeManagement@tomlinsongroup.com and we will help you from there!

Best regards,

Change Management Team

Tomlinson Group
