

**EXCESS SOILS REGULATION  
SUPERS, PM, PC.**

# EXCESS SOIL MANGEMENT REGULATION.

## Excess soil:

- Soil, crushed rock, or soil mixed with crushed rock, that has been excavated as part of a project and removed from the project area

# EXCESS SOIL MANAGEMENT REGULATION.

Manage soils to prevent adverse effects such as:

- Dust
- Tracking mud offsite
- Run-off and erosion

If you notice any indication of contamination, excavation must immediately cease and project leader or operator of the project area is to be notified.

Let us know when you have big hauls coming in (Courtney, Gordon...)

- Prevent delays at fill site
- Helps us plan if dozer needed

Ensure no garbage, debris, asphalt, concrete, rebar, brick, styrofoam, etc in the excess soil.

Asphalt and concrete are accepted at pits and quarries but must be separate from excess soil.

# EXCESS SOIL MANAGEMENT REGULATION.

What are our responsibilities once we receive approval to haul fill to a reuse site?

PM or PC to register the project on RPRA Registry – full procedure on SharePoint

Tracking

Hauling records

Properly manage soils on site

## Tracking Procedure:

Before removing excess soil from a project area, a tracking system must be developed and applied to track each load of excess soil during its transportation and deposit at the reuse site, landfill, soil management site, etc.

TREAD is only ONE PART of the system; you MUST follow ALL outlined processes and regulations.

# EXCESS SOIL MANGEMENT REGULATION.

## Hauling Record

### A. Generator

Company Name: R.W. Tomlinson Ltd.  
Source Site Name: CP000598

Click to open order request

The screenshot displays the TREAD web application interface. At the top, there are navigation tabs: Sales, Dispatch, Approvals, Live Map, and Settings. Below these are sub-tabs: Orders, Calendar, Drivers, External, Active, Pending, In-Progress, Done, and All. A search bar and a 'Filters' button are also present. The main content area shows a summary for a 'Pending' order request for 'R.W TOMLINSON'. The order is for 'Material Delivery' of 'GRANULAR A' material, starting on 30-Aug-2024 at 07:00 AM. The pickup and dropoff locations are '1042 RIDEAU QUARRY' and '23-TI143 ORLEANS OPERATIONS CENTER'. Below the summary, there are statistics for Assigned (0 of 0), Sent (0 of 0), Accepted (0 of 0 sent), Trucks Started (0 of 0), Delivered Quantities (0 of 0), and Delivered Loads (0 of 0). A table below shows the job details with columns for Driver & Vendor, Truck & Trailer, Status, Start, Service Type, Cycle, Delivered, Materials, Pickup & Dropoff, and Job ID. The table lists three jobs, each with a 'Send' button. A red arrow points to a 'New Order' button in the top right corner of the interface.
